## SKILLS

Analytical and adaptive DevOps Engineer with a profound grasp of high availability architecture and concepts. Purpose-driven professional with capacity to be a strong team player plus work effectively independently.

- A lazy person who enjoys involving challenges to resolve them and make processes faster and easier :)
- Acted as a team member in an agile environment and worked with scrum method

## EXPERIENCE

### Classeh | School Management Platform, IRAN - *DevOps Engineer*

JAN 2022 - Current - 1 yr 7 mos

- I joined the technical team as a DevOps Engineer. It's a great opportunity for me to experience new challenges and learn more.
- Responsible for maintaining production servers to ensure the delivery of stable services to all clients.
  - Implemented robust disaster recovery plans to promptly restore services and prevent data loss during critical incidents.

Aryan Kasraee CV

automated project builds and deployments  
nt, staging, and production

Successfully deployed and managed Kubernetes as an Infrastructure environment, significantly enhancing project availability and scalability under high-pressure scenarios while minimizing

downtime

- Oversaw the setup and maintenance of a VPN Access server, effectively resolving problems related to filtering and boycotts
